

Render Advance Tool for Autodesk MotionBuilder

This utility will allow you to perform the render of multiple panes in one frame.

Short description

Settings part has two tabs. First – Render settings, which has parameters meaning like in a standard MotionBuilder render dialog. And the second offers advanced features, in particular the place of 1 to 4 panes in one frame.

Install

Put plugin library into the ../MotionBuilder <version>/bin/win32/plugins/
After MotionBuilder running, you can find tool under Main Menu -> Open Reality -> Tools -> Render Advance.

If you have any questions, comments and suggestions, feel free to write about it!
